Monthly Indicators

A RESEARCH TOOL PROVIDED BY THE MINNEAPOLIS AREA ASSOCIATION OF REALTORS®

- 23.0%

February 2018

The four most prominent market trends for residential real estate are the ongoing lack of inventory; the steady, upward movement of home prices; and, recently, year-overyear declines in home sales combined with changing interest rates. Sales declines are the natural result of an inventory shortage, but higher prices generally indicate a higher level of demand leading to competitive bidding. Markets are thirsty for increased supply, so there is hope that more sellers will take advantage of what appears to be a ready and willing buyer pool.

New Listings in the Twin Cities region decreased 8.0 percent to 5,072. Pending Sales were down 12.1 percent to 3,635. Inventory levels fell 23.0 percent to 7,573 units.

Prices continued to gain traction. The Median Sales Price increased 12.7 percent to \$250,000. Days on Market was down 15.9 percent to 69 days. Sellers were encouraged as Months Supply of Homes for Sale was down 21.1 percent to 1.5 months.

In February, prevailing mortgage rates continued to rise. Recent increases are starting to have an impact on affordability, leaving consumers to choose between a higher payment or a lower-priced home. According to the Mortgage Bankers Association, the average rate for 30-year fixed-rate mortgages with a 20 percent down payment that qualify for backing by Fannie Mae and Freddie Mac rose to its highest level since January 2014. A 4.5 or 4.6 percent rate might not seem high to those with extensive real estate experience, but it is newly high for many potential first-time home buyers. Upward rate pressure is likely to continue as long as the economy fares well.

Housing Affordability Index

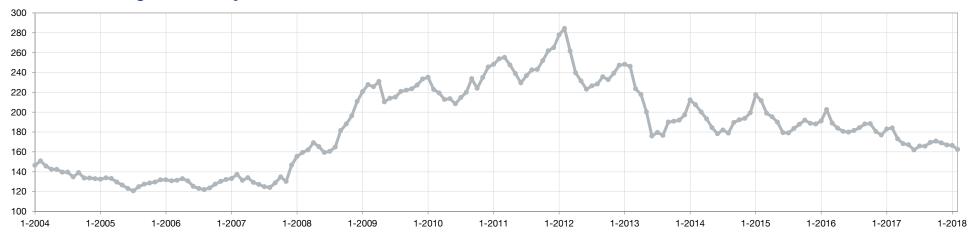

This index measures housing affordability for the region. For example, an index of 120 means the median household income was 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.
